Yensen, Peter

Asking Questions - Fall, p. 26

Yoffee, William M.

Mail Balloting for Directors in a Credit Union - Summer, p. 34

DID YOU KNOW that participants at NRECA's 1973 Data Processing Conference in New Orleans last October formed an organization to foster cooperative exchange of computer programs? It is called Rural Electric Computer Systems Exchange Group. Each region (following REA's five) has a Coordinator. Write to Bud Miller (Northeast Region) Morgan County REMC, P.O. Box 408, Martinsville, Indiana, 46151, for a copy of the first newsletter of RECSEG which lists the names and locations of the Coordinators.

C. E. Aultz

THE GREATEST of all resources, the indispensable ones, are the energies of individuals. Therefore, it is a key task of managerial leadership to recognize the existence of these often unused or partially used human talents, energies, and imagination. In short, the full release of human energy is the central purpose and function of the manager at all levels, in private as well as civic enterprises.

— David E. Lilienthal
